HIV PREVENTION ENGLAND

White guy community and how is that going? What are the findings?

How long has this drug been out for?

6:34 pm

You • Status

PrEP is a pill taken by HIV-negative people to stop them from getting HIV. Everyone should know about. #PrEPProtects is a new campaign from...

Also add if they are having a relationship/ affair or think they have been exposed to the virus within 72 hours. To ensure you are safe is 72 hours but the earliest the better

21:28

Are you a prostitute?

ge · 2d

It's not free though its affordable @£30 a monthly pack and its taken daily. Unless you have a partner who poses a high risk like those who inject drugs. I still think condoms are safer for unmarried partners.

You maybe won't get Aids. You'll get syphilis

instead.
